

Save energy costs using AI

Smart energy management system for industry

Our DAITABLE Smart Energy management will help you

Effectively manage your energy and save money, see for yourself

Measure

Our device collects the energy-flows data of each of your machines

Monitor

Have a real-time overview about the current situation on your smartphone or PC

Analyse

Get AI-bases predictions, reports, analyses and alarms whenever you need them

Improve

Make tactical and strategic changes to increase your effectiveness and save money

Find weak spots

Low efficiency, overconsumption or hidden defects can now be detected

Make forecasts

Get a warning to your device when the consumption aims towards limits

Know threads

Predictive maintenance diagnoses a potential machine failure due to anomalies in energy flows

Avoid failures

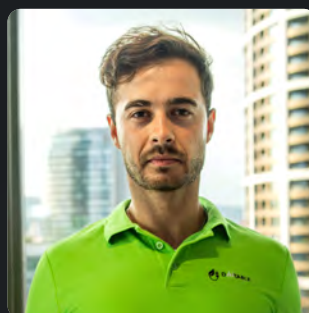

Avoid machine failures by using predictive models and save costs

Use power of AI to prevent machine failures

Effectively manage your energy and save money, see for yourself

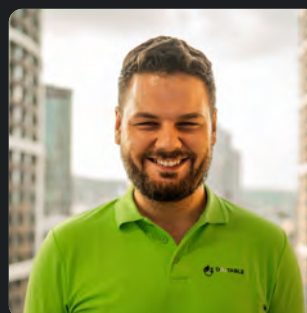

Meet our DAITABLE team

Helping you utilize the maximum potential of your technologies
